Analysis Report NEM 06/04

On request of the company Akuna Health Products Inc. we have analysed the following nutritional supplement for anabolic-androgenic steroids:

Lab. Code	Product name	Lot No.	Exp date	Remarks
NEM 06/04	Alveo	681-6-001169	02.10.05	originally packed, glass bottle with 950 ml brown fluid

GC/MS analyses of the products

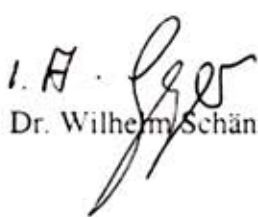

An aliquot of 1 ml of the supplement was analysed by gas-chromatography/ mass-spectrometry for the following anabolic-androgenic steroids: 19-nor-4-androsten-3 β ,17 β -diol, 19-nor-5-androsten-3 β ,17 β -diol, 19-nor-4-androsten-3,17-dione, 19-nortestosterone, 4-androsten-3 β ,17 β -diol, 5-androsten-3 β ,17 β -diol, 4-androsten-3,17-dione, DHEA, testosterone, 5 α -androstane-3 β ,17 β -diol and androstadiendione.

Results

In NEM 06/04 no anabolic-androgenic steroids could be detected above a concentration of 0,01 μ g/g.

Important note

This analysis report is exclusively regarding the products mentioned above. Without a written permission of the Institute of Biochemistry of the German Sport University Cologne this report must not be copied or published, not even partially.
